

Kensington®

VeriMark™ NFC+ Security Key

Today's digital landscape is increasingly vulnerable to password-based threats, including weak or reused credentials and sophisticated phishing attacks.

The VeriMark NFC+ Security Key Delivers FIDO2 Level 2–Certified Security.

It provides enterprise-grade protection against phishing and unauthorized access while supporting the latest FIDO® CTAP 2.1 protocol with backward compatibility. VeriMark™ NFC+ Security Keys enable advanced security features such as resident credentials, user verification, cross-platform passkeys, and enterprise attestation.

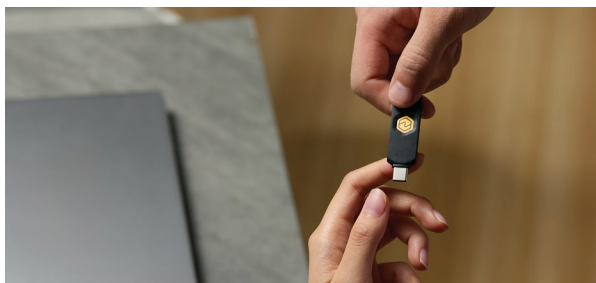

Simple Laptop Management

No drivers needed; Kensington software available for advanced features management.

Security Key Access Control

A security key offers a simple, intuitive way to manage access to company laptops with clear log history oversight.

Authorized Access Only

Only authorized users with the security key can log in to the shared laptop.

USB NFC Dual Interface

Tap-and-go convenience with USB connectivity and contactless NFC support for both mobile and desktop devices.

Why Organizations Use It

- ▶ Manage laptop access in shared-device environments no cloud service required.
- ▶ Enroll a security key to grant authorized users access instantly.
- ▶ Ideal for hospitals, manufacturing lines, warehouses, hot-desk offices, retail/point-of-sale, transportation & logistics, field work, and data centers.
- ▶ Allows each user to securely sign in to multiple websites with the same key.

Kensington®

Flexible, Secure Login Using a Security Key or Mobile Device*

The VeriMark™ NFC+ Security Key

Built for Easy Deployment Ideal for enterprise rollouts and streamlined multi-laptop

Ideal for Shift-Based, High-Traffic Workplaces

- Hospitals
- Manufacturing lines
- Factory warehouses
- Shared hot-desk offices
- Data center laptops
- Retail & Point-of-sale
- Transportation & Logistics
- Field Work

Kensington® software for easy management.

- **Key Manager Software**
Customize PIV by configuring PINs and adding certificates.
- **Access Software**
Enables secure, password-less Windows sign-in**
- **Companion Phone App**
Adds extra protection by generating a single-use security code for Windows login.

Built to Last, Ready for Anywhere

- IP68-rated housing for water, dust, and crush resistance.
- Built to withstand daily wear and tear.
- Slim, keychain-ready design for easy portability.

*Each account can be linked to one mobile device, but it can use multiple security keys. We recommend using a mobile device only if you don't have your key with you.

**ARM-based CPU laptops are not supported by VeriMark™ Access at this time and only compatible with Windows 10/11.

The VeriMark™ NFC+ Security Key
