SD3500 & SD3600 USB 3.0 Universal Dock

Universal Docking with a Difference

With Kensington's universal docking stations, there are no restrictions on productivity. Unlike proprietary and OEM docks, Kensington's universal docks connect people to the latest devices. Our docks not only release businesses from costly and restrictive ties to single brands, they also make it easy for employees to plug-and-perform.

- **Expand your workspace** – with an HDMI port and a DVI port, you can expand your workspace and increase your productivity by adding 2 external screens

- **Extend/mirror modes** – drag any open applications to an external monitor so that you can work across multiple screens, or use mirror mode to replicate content from your computers display to an external screen

- **2 Front & 4 Rear USB ports** – the ideal place to transfer data up to 5Gbps and connect all of your peripheral accessories

- **Display settings software** – our intiutive display management software allow you to customise your docking station, to maximise your docking experience

- **Gigabit ethernet port** – avoid downtime with a reliable wired connection to your network or the internet

- **Zero footprint mounting** – unclutter your desktop by mounting dock to the back of your monitor
